For Immediate Release

November 7, 2018

## **“Solarize East Hampton” Campaign Extended** **Discounts on Solar Panels Offered to East Hampton Residents Continue** *Other Popular ‘Energize East Hampton’ Programs Continue*

The Town of East Hampton will continue the **Solarize East Hampton** campaign beyond the original October 31, 2018 sign-up deadline, due to continued strong interest from residents. The **Solarize East Hampton** campaign makes it easier and more affordable for home and business owners to go solar.

East Hamptoners can have rooftop solar arrays installed at a discounted price offered exclusively through GreenLogic Energy, a local company chosen as the campaign’s designated solar installer. Upon signing up for Solarize, GreenLogic will help home and business owners through every step of the process, beginning with a free consultation, site assessment, and estimate.

Town Supervisor Peter Van Scoyoc had a rooftop solar electric system installed on his home through **Solarize East Hampton** earlier this year. “We paid nothing out of pocket; roughly half of the total cost will be covered by state and federal tax credits and low interest financing covers the rest,” Supervisor Van Scoyoc said. “We are meeting all of our energy needs, while also providing clean, renewable energy to the grid.”

“GreenLogic made the process very easy. They answered all my questions and made sure I would be getting the most out of my rooftop solar system,” said Montauk resident Richard White.

The campaign is part of *Energize East Hampton*, a renewable energy initiative launched in May 2018 that connects residents and local businesses to programs that help them lower energy bills and consumption, and furthers the town’s efforts to reach its community-wide 100% renewable energy goals. Solarize East Hampton is made possible with support from the New York State Energy Research and Development Authority’s NY-Sun initiative.

The program is available to building owners in East Hampton, including in the incorporated villages within the town.

Those interested in having rooftop solar panels installed may take advantage of the discounted pricing. More information and sign-up is at [EnergizeEH.org/solar](http://EnergizeEH.org/solar), or at the town Natural Resources Department at 300 Pantigo Road, Suite 107, East Hampton.

Other energy and money-saving programs offered through *Energize East Hampton* include free home energy audits under the East Hampton Green Homes program, which identifies areas of energy waste and recommended energy efficiency improvements, and South Fork Peak Savers, which offers free energy-saving Nest “smart” thermostats to residents and businesses with central air conditioning, substantial rebates for existing “smart” thermostats and pool pump replacements, and free commercial energy audits and LED lighting upgrades.

Information and the sign-up form for all *Energize East Hampton* programs can be found at [EnergizeEH.org](http://EnergizeEH.org)
