SOUTH FORK COMMUTER CONNECTION TRAINS TO BE AFFECTED BY LONG ISLAND RAIL ROAD TRESTLE WORK

**Beginning October 15, 2019, train service will terminate in Southampton;
Riders with destinations east of Southampton will be provided with bus service**

Trestle work expected to continue through November 10

During the period when train service is interrupted, the Long Island Rail Road will provide buses that will discharge passengers at train stations east of Southampton.

In addition, to provide commuters with another option, East Hampton Town's South Fork Commuter Connection bus shuttle, the Hampton Hopper, will provide direct bus service from the Southampton railroad station. Those buses will go directly to East Hampton Town and follow established routes to drop riders at or near their workplaces. They will not make stops at the Long Island Rail Road stations; passengers who wish to end up at the stations may take the Long Island Rail Road buses.

The Hampton Hopper shuttle buses, unlike the buses LIRR will provide, will be able to vary their routes between Southampton and East Hampton as necessary to avoid traffic.

South Fork Commuter Connection LIRR train schedules, and Hampton Hopper shuttle bus schedules and routes for East Hampton Town, can be found at Mta.info/lirr and on the East Hampton Town website at EHamptonNY.gov.

Schedule updates for the October 15 to November 10 period, both for the LIRR trains and for East Hampton's Hampton Hopper SFCC shuttle – which will have earlier afternoon pickup times to accommodate for the drive to Southampton -- will be posted when available.
