**FOR IMMEDIATE RELEASE**  
August 12, 2022

## **Electric Vehicles: Everything You Need to Know**

**Are gas prices taking a bite out of your budget?  
Learn everything you need to know to save money and transition to a greener future with an electric vehicle.**

**A recent East Hampton Town panel discussion covered the details. View the event here:** <https://energizeeh.org/outreach-events/> and read about electric vehicles on the town website: <http://ehamptonny.gov/717/Electric-Vehicles>

At the panel discussion, local electric vehicle owners discussed key considerations for EV purchases and maintenance with members of the town's Energy and Sustainability Committee.

### **Some things to know:**

- NYS is offering rebates of \$2,000 on new or newly leased EVs, and buyers may also benefit from a federal tax credit of up to \$7,500, depending on the car manufacturer. Rebates are also available for the purchase and installation of at-home chargers. Go for the win, and charge your car overnight with energy generated from rooftop solar panels!
- Technological improvements are helping to lower the costs of electric vehicles, and as EV sales increase, prices are expected to continue to come down
- EV car drivers enjoy the quiet engines, and the knowledge that the car they are driving is not contributing to greenhouse gas emissions from the burning of fossil fuels. East Hampton Town is doing its part, under its Fleet Efficiency Policy, (<http://ehamptonny.gov/DocumentCenter/View/7548/Resolution-2020-1176-EH-Fleet-Efficiency-Policy?bidId=>) to replace internal combustion engines in the municipal fleet with electric vehicles, to help reach the Town's renewable energy goals.

By purchasing an electric vehicle, “your bottom line will benefit as much as the planet. And that’s certainly a win-win,” said East Hampton Town Councilwoman Cate Rogers, liaison to the group.

Whether you’re looking for EV info and rebates, a free home energy audit, discounts on solar installation, or information on how to switch to green heating and cooling equipment, Energize East Hampton is your source for information.
