*Note: under this scenario all estimated costs above the red line would fall under the intended SIP funding limits when combined with I/A OWTS material and installation costs. Costs below the red line would require out of pocket expense from Property Owner.*

### Septic Improvement Program (SIP) Notes

- Please see Vendor cost ranking document for I/A OWTS material and installation costs.
- Base prices provided in the document do not include the cost of a site survey, soil borings, percolation test, or additional design parameters that if needed could increase costs and may be incurred at the homeowner expense.
- Actual costs may vary based on site constraints. Homeowners are urged to contact Designers to discuss project specific costs for their Property.
- Some designers may have geographic limits on their service area. Homeowners are urged to contact Designers to see if they fall within their service area.
- Grant funding allocated for I/A OWTS design services are anticipated not to exceed \$2,500. Any additional expenses associated with the design of the I/A OWTS would be the responsibility of the homeowner.
