

# EARTH DAY 2010

Thank you to Group for the East End for rallying the troops once again for a successful Earth Day restoration project!

Group for the East End organized volunteers to restore a portion of Louse Point's beach after the land was disturbed from equipment used to dredge Accabonac Harbor. With the help of the Town's Natural Resources and Land Acquisition & Management Departments, adults and children alike joined together to plant beach grass and other beach plants to fill in the bare sandy area.
